Instant Cutaway

This is a simple but impressive effect that at one time might have been next to impossible for the average person to recreate.

Step 1

Placing Vector Art

Here we selected a nice drawing of a car. For this effect, fairly complex clip art works best.

Step 2

Make a Duplicate

We will use the duplicate command on the drawing of the car to make an exact copy.

Instant Cutaway (Continued)

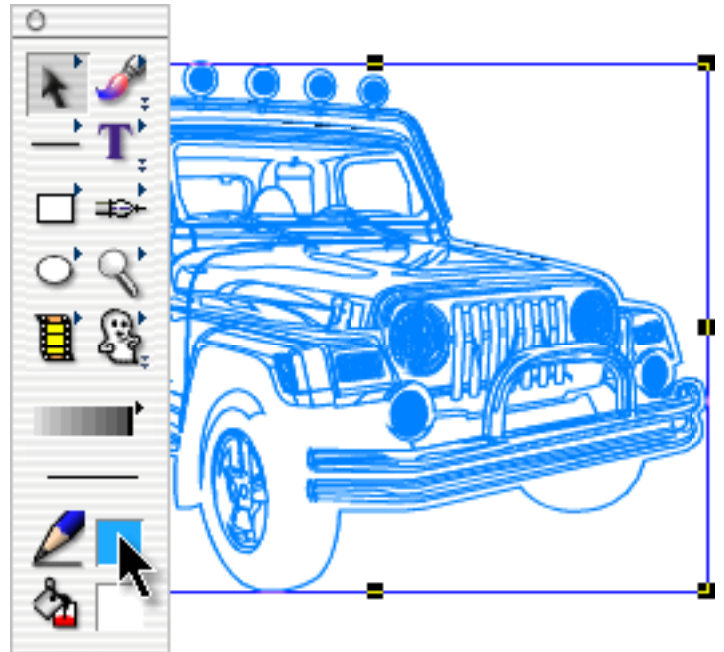

Then we will place the copy directly on top of the original.

Step 3

Changing Colors

We will set the Ink Fill color to white and the Pen color to a light blue.

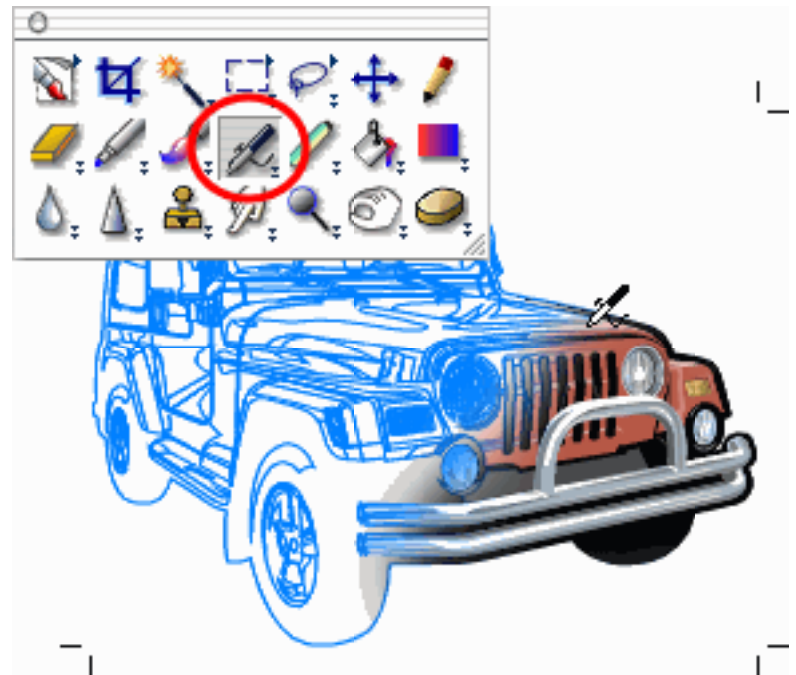

Step 4

Painting with Sprite Technology

Lastly we will use the Sprite tool from the Tool-box to add a transparency mask and start painting away with the Paintbrush Tool.

When using the Sprite tool anything painted black will become transparent and anything painted white will become visible.

Instant Cutaway (Continued)

You could see as we create this effect that it looks like we are blending the line work into a fully rendered drawing.
