LIKE USING ENDNOTE ON CAMPUS?

AND WANT ALL THE FEATURES ON YOUR OWN PC?

NOW YOU CAN EXTEND YOUR USAGE TO YOUR HOME COMPUTER WITH AN ENDNOTE PERSONAL LICENCE.

ONLY students and staff affiliated to academic institutions with an EndNote Chest Site Licence are eligible to buy personal licences, and you’ll never be able to buy it cheaper!

A Personal Licence will set you back as little as £60+VAT compared to a standard Single-user EndNote Licence which costs from £159!

What’s more, you can install your software on up to three home computers using Windows or Mac and customise features to suit the way you work rather than having to use the default or standard settings of university-owned PCs.

You’ll also be able to access EndNote at your convenience and carry on using it even after you’ve graduated!

Using EndNote online
EndNote users now effectively get two tools for the price of one with free access to EndNote online. This lets you carry out research, store references and PDFs online, and create citations even if you don’t have access to your own computer. What’s more, you’re able to share groups of references with colleagues and collaborate on research projects regardless of location.
